SKILLS

Streaming

Kafka, Airflow, Spark, Hadoop

Cloud

AWS, GCP, Azure, Databricks

Warehousing

BigQuery, Snowflake, Redshift

Transformation

dbt, Data Vault 2.0, SQL

Languages

Python, SQL, Scala, Java

DevOps

Docker, Kubernetes, Terraform, CI/CD

BI

Power BI, Tableau, Grafana, GA4/GTM

EDUCATION

MSc Data Engineering

Aivancity University, Paris
2023 - 2024

BS Mathematics

Air University
2016 - 2020

CERTIFICATIONS

AWS Cloud Practitioner
IBM Data Engineer
Google Data Analytics
Machine Learning
(Coursera)

LANGUAGES

English

Advanced

French

A2 / B1

PROFILE

Results-driven Data Engineer with 4+ years of experience building real-time streaming pipelines, cloud data warehouses, and ML-powered analytics platforms. MSc Data Engineering, Aivancity University Paris. Expert in Kafka, Airflow, BigQuery, dbt, and multi-cloud architectures (AWS / GCP / Azure). Proven track record delivering end-to-end data solutions for real clients across AgriTech, FinTech, and e-commerce verticals.

PROFESSIONAL EXPERIENCE

Data Engineer Ceres-Advisory (Blockchain Web3), Paris

2023 - 2024

- Architected real-time GA4 to BigQuery streaming pipeline via GTM; built Power BI and Grafana dashboards for live KPI monitoring and instant campaign performance evaluation
- Engineered blockchain data models with optimized SQL (partitioning, window functions) supporting low-latency dashboard queries over large datasets
- Designed serverless AWS architecture (Lambda, Step Functions, S3) for resilient and scalable data ingestion pipelines

Data Analyst and Performance Marketing PriceOye (E-Commerce)

2021 - 2023

- Engineered automated data pipelines and Power BI dashboards for real-time ROI and performance tracking across marketing campaigns
- Applied statistical modeling and AI-powered audience segmentation to optimize marketing strategies and improve conversion rates

KEY PROJECTS

Livestock Intelligence *Client Project*

Kafka • Airflow • BigQuery • scikit-learn

Real-time dairy herd pipeline: Kafka ingest, BigQuery CTE feature engineering with 5 anomaly flags and LAG window functions, then 3 production ML models for health classification, fertility prediction, and milk-yield regression.

Reddit ETL Pipeline

Airflow • Terraform • AWS • BigQuery • dbt • Redshift • Tableau

Automated ETL pipeline on AWS following Data Vault 2.0; dbt transformations and modelling in Amazon Redshift; interactive Tableau dashboards for analytics and business reporting.

Synthetic Data Engine *Client Project*

Python • pandas • Google Sheets API

Rule-based KPI generator for investor data room: Dirichlet disaggregation of 22 months history into 626 daily rows, 12-check validator covering monotonicity and business rules, idempotent cron-scheduled Sheets upsert.
