Portfolio

TECHNICAL COMPETENCIES

Programming
Python, SQL
TypeScript, JavaScript
HTML, CSS

Data Engineering
Airflow, Kafka, Spark
Hadoop, dbt, ETL/ELT
streaming pipelines
Data Vault 2.0

Databases and Warehouses
PostgreSQL, Neon
Redis, pgvector
BigQuery, Snowflake
Redshift, Databricks

Cloud
AWS, GCP, Azure
S3, Lambda, Step Functions
Vercel, Hetzner VPS
Cloudflare R2

Backend and APIs
FastAPI, REST APIs, Django
Spring Boot, SQLAlchemy
Alembic, Prisma, Pydantic
JWT, RBAC, NextAuth
Celery, Socket.IO

Frontend
Next.js, React
Tailwind CSS

DevOps and Infrastructure
Docker, Docker Compose
Kubernetes, Terraform
GitHub Actions, CI/CD
Nginx, Linux, SSH
Let's Encrypt

AI and Automation
Claude API, Gemini API
OpenAI API, PydanticAI
scikit-learn, n8n

Analytics and Observability
Power BI, Tableau, Grafana
GA4, PostHog
Sentry, Prometheus

Sustainability Data
LCA, carbon accounting
product and BOM models
process and factor mapping
unit normalization
lineage, versioning

EDUCATION

MSc Data Engineering
Aivancity University Paris | 2023-2024
BS Mathematics
Air University | 2016-2020

CERTIFICATIONS

AWS Cloud Practitioner • IBM Data Engineer
Google Data Analytics • Machine Learning - Coursera

LANGUAGES

English - Advanced | French - A2/B1

Mudasir Shafiq

DATA ENGINEER | SUSTAINABILITY DATA | CLOUD PIPELINES

Data Engineer with 4+ years of experience building production ETL/ELT pipelines, cloud data platforms, and AI-enabled analytics systems. Experienced in auditable sustainability-data workflows across products, bills of materials, processes, units, and versioned environmental factors, with strong data-quality and lineage controls.

EXPERIENCE

Data and AI Engineer
Jul 2026-Present
Growlytics | Remote

- Architected a multi-tenant PostgreSQL model and serverless ingestion across Meta Ad Library, Google Ads Transparency, TikTok via Apify, Meta Marketing, and Google Ads APIs.
- Built deterministic performance-metric pipelines and grounded Claude/Gemini analysis, separating computed evidence from generated insights.
- Automated scheduled ingestion, AI narrative generation, PDF reporting, subscription billing, and email delivery with Vercel, Blob storage, cron jobs, Paddle, and Resend.

Data and AI Engineer / Full Stack Engineer
Jun 2026-Present
GrowMore and Collabs+ | Dubai · Remote

- Built a production Next.js and FastAPI platform with PostgreSQL, SQLAlchemy, Alembic, Pydantic, JWT/RBAC, Redis cache-aside workflows, file ingestion, and background transactional email.
- Dockerized and deployed the platform behind Nginx on Hetzner with Let's Encrypt, GitHub Actions CI/CD, health monitoring, and isolated production/staging databases, Redis instances, networks, and volumes.
- Designed the Collabs+ PostgreSQL architecture across 9 business modules and 35 tables, enforcing role-based access, soft deletion, immutable audit history, relationship constraints, and user-controlled notification preferences.
- Defined AI matching and realtime data flows using pgvector embeddings and IVFFlat search, Celery with Redis, Socket.IO Pub/Sub, Cloudflare R2, and direct OpenAI/PydanticAI RAG pipelines.

Data Engineering Consultant
Feb-Jul 2026
Watershed · Contract | Paris · Remote

- Designed normalized models linking products, bills of materials, manufacturing processes, and environmental factors for traceable product-impact calculations.
- Built repeatable ETL workflows that standardized units, validated keys and mappings, and preserved raw-to-normalized lineage for spreadsheet and catalogue data.
- Implemented versioned material-to-process and emission-factor mappings with checks for ambiguous candidates, missing factors, unit mismatches, and reproducible calculations.

Data Engineer
Dec 2023-Jun 2024
Ceres-Advisory · Blockchain and Web3 | Paris · On-site

- Architected a real-time GA4-to-BigQuery pipeline through GTM, cutting reporting latency from hours to minutes across 15+ KPI dashboards.
- Optimized multi-million-row blockchain datasets with partitioning and window functions, reducing SQL query time by 60%.
- Designed resilient AWS ingestion with Lambda, Step Functions, and S3, achieving zero post-deployment pipeline failures.
- Developed a DistilBERT sentiment-analysis pipeline and surfaced model outputs through Power BI and Grafana monitoring views.

Data Analyst and Performance Marketing
Jan 2022-Sep 2023
PriceOye · E-commerce | Pakistan

- Sustained ROAS of 6.33x-43x and delivered PKR 18M monthly GMV through data-driven campaign optimization and audience analysis.
- Raised customer retention from 10% to 15% through AI-powered audience segmentation and automated lifecycle campaigns.
- Automated Power BI data pipelines and KPI dashboards for real-time ROI tracking, removing 10+ hours of weekly reporting.

SELECTED DATA PROJECTS

Livestock Intelligence | *Kafka · Airflow · BigQuery · scikit-learn*
- Built a Kafka-to-BigQuery dairy-herd pipeline with Airflow orchestration, CTE-based feature engineering, and LAG window functions.
- Prepared production features for health classification, fertility prediction, and milk-yield regression models.

Reddit ETL Pipeline | *Airflow · Terraform · AWS · dbt · Redshift · Tableau*
- Automated end-to-end AWS ingestion with Airflow and Terraform, then modelled Data Vault 2.0 transformations in dbt and Redshift.
- Published curated analytical datasets through repeatable Tableau dashboards for stakeholder reporting.

Synthetic Data Engine | *Python · Validation Rules · Google Sheets*
- Generated configurable daily synthetic datasets with field-level constraints and business-rule validation.
- Implemented idempotent Google Sheets upserts to prevent duplicates and support repeatable downstream testing.
